# GIVI in the world

## COMPANY

The Company GIVI was founded in 1978 by an intuition of Giuseppe Visenzi, a talented rider during the sixties in several World Championship categories, and very soon became a leading company in the sector of motorcycle accessories.

The success of its products crossed the national boundaries in a very short time thanks to the passion and to the enterprising ability of its founder, who was assisted with great care and the determination by a work team that has always been able to think of and realize new products.

Particularly decisive is the constant

research carried out with the aim of developing materials and the use of new production technologies.

The result is now a range of accessories that are not only accessories, but proper complements for motorcycles, efficient, technologically advanced and always with a new and winning design. GIVI, whose production facilities and head quarters are located in Flero, in the industrial heartland of Brescia, is now able to offer its products in more than 50 Countries, with direct branches in France, UK, Spain, Germany, USA, Brazil, Malaysia and in Vietnam.

This widespread diffusion makes it possible to satisfy the needs of every motorcyclist everywhere in the world.

GIVI boasts a production site that covers an area of over 30.000 sq mtrs, with a staff count of more than 100 employees, that take great care in all production phases, from the research / product planning up to its distribution, and is able to make use of the most modern technologies available, in order to obtain production responding to the market requests and characterized by a high technological content.

**MADE IN ITALY**

**GIVI**

EXPLORE. ENJOY.

GIVI placed all manufacturing units and the main logistic warehouse within a few kilometers radius from the headquarters in Flero (Brescia). A total of more than 100 trained employees work here, setting up and monitoring the work of advanced tools and production machinery.

GIVI is a strong believer in automation. It's our highly skilled technicians who ultimately refines, assembles, polishes and checks the coupling of each and every product, granting the maximum quality.

Today just a few Italian companies are structured to follow the true concept of bringing "Made in Italy" quality to the international market; GIVI is among those.

## QUALITY CONTROL

One of our strongest assets is the pursuit of a quality standard that can greatly elevate the riding comfort and safety of motorcyclists.

This is GIVI's mission. A commitment made possible by teamwork, based on responsible product development and great respect for the end user. GIVI employs the best available technology to offer ease of use, safety and emotional involvement, turning the brand into a lifestyle. Composite techno fibres, exclusive techno polymers, complex molds, high precision machinery and injection processes, strict quality controls, products, shapes, details and ever new destinations of use testify the total dedication of the brand to the consumers' need. No wonder GIVI received the "#1 Rating" award, certifying that the Company reached the maximum possible level of reliability on the market.

# SCREENS

Regarding the styles and the materials, the “screen” collection of GIVI is the largest on the market and pays much attention to the current trends.

The range includes screens and aerodynamic spoilers equipped with specific fitting kits for the most popular naked motorcycles, road and sportive motorcycles.

This collection also provides solutions for the proposed for tourer, sport-tourer and cruiser, with universal and dedicated screens and windshield.

And, finally, paying attention to the scooter world, for which GIVI has been long been renowned, the windscreen for each outbound model, from 50 cc to big engine capacity. Among the latest news we bring attention to the airstars for scooters, complete with serigraphy at the bottom for strong visual impact and the new entry Airflow, the windscreen with adjustable spoiler, designed by R&D Department of the company, which has no rivals in terms of versatility and protection.

1. Resistance to UV rays and weathering
2. PLEXIGLAS® GS is guaranteed against yellowing
3. PLEXIGLAS RESIST®: Combines the excellent quality of PLEXIGLAS® with the toughness of polycarbonate. Sheet thickness 3mm
4. PLEXIGLAS® GS has increased brightness and versatility

motorcycle equipped with non-tubular handlebars

## UNIVERSAL TRANSPARENT SPOILER MOUNTABLE TO FAIRINGS / WINDSCREENS; THE ALUMINUM FITTING KIT ALLOWS TO ADJUST BOTH HEIGHT AND INCLINATION.

The customer needs to confirm the original fairing/ windscreen is rigid enough to allow the mounting of the SHIELD +

Shield+ is made entirely of billet aluminum and is manufactured one piece at a time with numerical controlled milling, then finally anodized. The high quality raw material is found even in aeronautical engineering for its excellent weight-performance and high resistance to corrosion.

height and inclination adjustable

The screen is 4mm thick and is made of a polymeric material approved by TUV, compared to glass this is more transparent (S180T) and more lightweight, about half the weight.

- The fitting is simple and safe, in fact in order to install it, it is not necessary to modify or create any holes in the original windshield.

- It fits onto any form of windshield for motorcycles and scooters on the market: the lock keys are included in the package.

- The sleeves are made of a technical material that does not ruin the windshield and guarantees optimum grip even at high speed, making the Shield + a reliable protection to deflect the air flow.

## 140A / 140S

### UNIVERSAL SCREEN WITH SPECIFIC FITTING KIT AL\_\_ \_A

The windshield "140" is for all those motorcycles sporting a retro round front headlight. It has a protective surface made of Plexiglass®, measuring 35 x 41 cm (HxL) and its main feature is the slightly angled, bevelled shape, highlighted by moulding.

To mount this screen, it is necessary to combine it with the appropriate fitting kit, specific to your model of motorcycle.

140A

Universal transparent screen  
35 x 41 cm (H x W)

140S

Universal smoked screen  
35 x 41 cm (H x W)

## A800N TAILOR MADE

To mount this screen, it is necessary to combine it with the appropriate fitting kit, specific to your model of motorcycle.

### UNIVERSAL SCREEN WITH SPECIFIC FITTING KIT A\_\_ \_A

The A800N model is morphs 'signature' past designs into avant-garde styles. Moved by well-designed fairings, it has a fibreglass structure (with a 'realistic' simulation of a black glossy paint job) that surrounds the headlight to which it is attached and a low angled smoked screen, which is cut horizontally along the top. It is a perfect match for classic or modern bikes and its dimensions will modify the stylistic impact of the motorcycle.

## 100AL / 100ALB RACE CAFE

To mount this screen, it is necessary to combine it with the appropriate fitting kit (AL\_\_ \_A), specific to your model of motorcycle.

### UNIVERSAL SCREEN WITH SPECIFIC FITTING KIT AL\_\_ \_A

Universal screen for naked motorcycles with a classic/modern style that perfectly reproduces the "race cafe" look, for which it was specifically designed. To embrace this philosophy, it was entirely made of metal, namely finely brushed and anodized aluminium, thickness of 2 mm, to withstand weathering. Essential, lightweight and technical, there are no plastic components. It has a gold anodized aluminium riveted GIVI label.

## HP\_\_\_ SPECIFIC HAND PROTECTORS

The Hand Protectors by GIVI is a useful accessory to protect your hands against cold, rain or the insects that collide with your gloves whilst driving. Every model of hand protectors has its own appropriate fitting kit, specific to your particular model of motorcycle.

## EH\_\_\_ SPECIFIC EXTENSION FOR HAND PROTECTORS

Many motorcycles are equipped with original hand protectors, but not all are able to offer adequate protection to your hands against cold or rain. To increase protection, the Hand Protectors Extension is now available and this perfectly copies the inner part of the hand protectors and protrudes from the outline just enough to ensure effective protection. To attach such an extension, it is not necessary to drill or modify the original hand protectors in any way

# AIRFLOW GIVI SYSTEM

Thanks to the easy and quick way in which one can adjust the height of the windscreen, the AIRFLOW system becomes unique in its kind, allowing the rider to find the right aerodynamic protection according to his own height.

## LOWER IMPACT, GREATER PROTECTION!

Thanks to the Venturi effect that is created whilst moving, it was proved that with an AIRFLOW one obtains an aerodynamic protection equal to that obtained by using a traditional windscreen 5 cm higher.

### Traditional Windscreen

### AIRFLOW GIVI System

# AIRFLOW IS A GREAT HELP IN RAINY WEATHER!

Anyone who drives a motorcycle or a scooter in rainy weather, can finally solve problem of raindrops that end up on the cover plate, which when beamed by the cars' headlights can cause low visibility that can increase danger risks.

But with an AIRFLOW GIVI windscreen you could lower the screen just below eye level and keep driving safely because thanks to the Venturi effect the rain is pushed over your head.

## Traditional Windscreen

## AIRFLOW GIVI System with Venturi effect
